## GTA IV Disc 2.iso UPDATED

ok so my friend has a mac and i cannot install it for him, can you install it on a mac. i have a little over 700m of wireless so i wouldnt have to worry about wiring it up. i just got a disc that i cannot install it, there is no disc 2 i have been trying to get the disc 2 so i can install it, the installer says it cannot load the disc. i am trying to install it on my friends mac, could you install it on a mac. i have a little over 700m of wireless so i wouldnt have to worry about wiring it up. i just got a disc that i cannot install it, there is no disc 2 if you have been using a computer for a while you will know you can choose which type of disc to burn your disc on, you have the option to burn on dvd or cd which is the same thing, you can burn on the dvd r, dvd rw, dvd-rw, dvd-ram, cd-rw, and cdr discs, when you have made your selection then you can go on to creating your disc, the first thing you want to do is burn your disc image to the disc, you do this by pressing the eject button on your computer then when you have selected your disc go to the bottom of the window and select the burn image option, a second copy of the disc doesn't have the cutscene dialogue on it, you'll probably be missing out on some of the final cutscenes, that's okay though, you don't need to be an expert to get through the game, if you get stuck, just select the quick mission mode and the game will give you a walkthrough, if you want to skip the cutscenes though, you can do so by loading up the game normally and getting to the mission select menu, select a quick mission and skip through the cutscene, you can fast forward through the cutscene, too, just go to the cutscene and press pause, select fast forward and you'll skip right through the cutscene and on to the mission.

## GTA IV Disc 2.iso

hi, i have a mac with 4 gigs of ram and a 320 gb hard drive. i download the gta4-crack2-dvd1 patch and i'm stuck. i use pff-o-matic to begin with and i can't get any further into the process, it stops at a spot about halfway through the installation. then i downloaded the pff-o-matic3.exe but it says i can only install the disc with pff-o-matic. i've tried almost everything i can think of. thanks for any help i have a scenario (or three?) in mind (perhaps one with too many scenarios), and i would like someone to build the base iso so that i can clean up the settings and seed the iso, and then re-build it (with different options). i would use the clean iso function to strip everything that's not necessary. in that case, the isos would be the same as the difference files above, for non-vlc players. then they could all join together to create a base iso. in the future, i could expand on all the options and then seed it if i need to make more isos. i would like to be able to have all the tools that i can be able to do this myself in the future, but that requires someone to build it. i also have a few questions that i would like to ask as well. i know that the files (if they even are files) are stored on the disc, and not in the iso file. that means that they need to be copied to the cd-rom drive, and then the iso file assembled from that. from my understanding, the iso file is not the same as the original game disc (you would need to open the disc and copy the files out). how would i go about doing that? also, what exactly happens in the boot sector of a disc when it is started? i would think it would just load into the memory, but not actually trying to see where it is on the disc at all. if it is, then i need to see if there is a way to make this happen, and if not, i should probably just create the base iso, and then just add in the options. 5ec8ef588b
